DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

With respect to tether designs:

Species 1: represented by figure 3a

Species 2: represented by figure 3b

Species 3: represented by figure 3c

Species 4: represented by figure 3d

With respect to lateral tether elements:

Species 1: represented by figure 3e

Species 2: represented by figure 3f

Species 3: represented by figure 3g

With respect to tether to airbag cushion attachment arrangements:

Species 1: represented by figure 4a

Species 2: represented by figure 4b

Species 3: represented by figure 4c

Species 4: represented by figure 4d

Species 5: represented by figure 5a

Species 6: represented by figure 5b

Species 7: represented by figure 5c

Species 8: represented by figure 5d

Species 9: represented by figure 5e

Species 10: represented by figure 5f

Species 11: represented by figure 5g

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species with respect to the tether designs, the lateral tether elements, and the tether to airbag cushion attachment arrangements for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that at least claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to Mss. Hargitt, Laura on October 20 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan C. To whose telephone number is (571) 272-6677. The examiner can normally be reached on Mon-Fri (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on (571) 272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
